# **GHOST A PHOTO**

Original

Ghosted to 30%

## **SAVE A COPY**

- Work from a copy, not the original; go to File > Save as...
- Add the word Ghosted or some other descriptive term to the end of the file name.
  For example: 12345 P26 Background Ghosted.
- Click Save.

# **TO GHOST A PHOTO**

- Open the Levels dialog box, Image>Adjust>Levels or Command/Ctrl + L.
- Drag the bottom left Output Levels slider to the right until the photo is as light as is needed.

Hint: There are 256 levels of gray; 10% of 256 is 25.6.

#### **GHOST A PHOTO TO 30%**

- Multiply 25.6 by 3
- Subtract the result, 76.8, from 256
- The answer is 179.2
- Move the slider to 179 or 180
