

TEXT WRAP IN ADOBE® INDESIGN®

Text can be wrapped around a graphic, a shape or other text in InDesign.

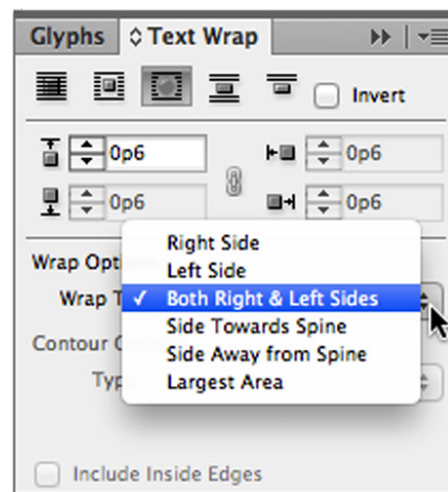

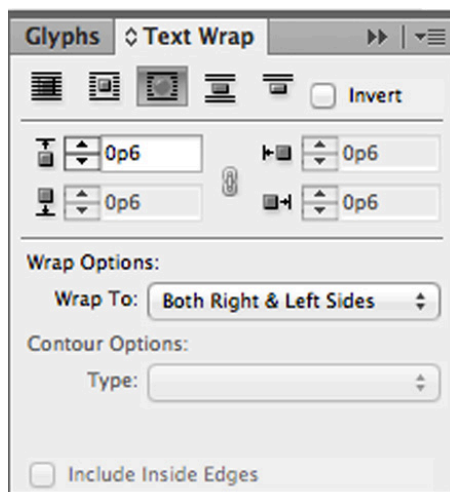

- Draw the shape, place the graphic or type the text you want the text wrapped around.
- If the text is to be wrapped around other text, it can be wrapped around the text frame or the text can be converted to outlines. To convert to outlines:
 - Select it with the **Selection** tool (arrow)
 - Go to the **Type** menu and select **Create Outlines** to change the text to a graphic element.
- Select the graphic, shape, text or converted text. and place it over or next to your text.
- Go to **Window > Text Wrap**
 - Choose a wrap option: No wrap, Wrap around bounding box, Wrap around object shape, Jump object, Jump to next column.
 - Basic text wrap can also be added with the Contol palette.

Text wrap

- The example uses **Object shape**.
- Enter the amount to offset the text from the object in the offset fields (the number of fields depends on the wrap option selected).
- InDesign CS4 and CS3 have different Wrap Options to customize the wrap
- Choose from Both Right & Left Sides, Right Side, Left Side, Side Towards Spine, Side Away From Spine and Largest Area

- The wrap can be customized with the **Direct Selection** tool (white arrow).
 - **Object Shape** wrap works best.
- Click on the object to select it.
- Click on a point and drag it to a new position.
- To add points, click on the **path** with the **Pen** tool.
- To delete points, click on a **point** with the **Pen** tool.

Text wrap

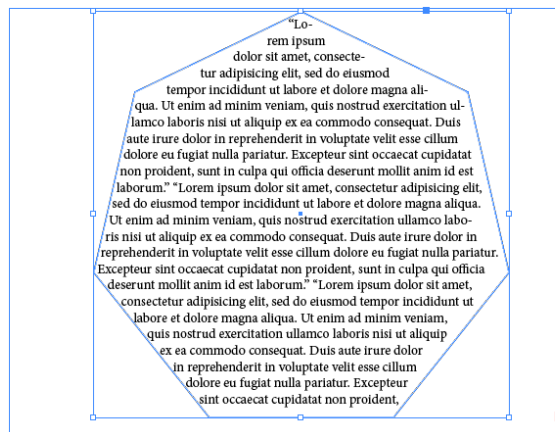

FLOW TEXT INSIDE SHAPE

- Draw a polygon or shape
- Either:
- Click inside the shape with the **Type** tool and import or paste your text
- Or
- Move the polygon/shape over your text block
- Choose the **Wrap around object shape** wrap option

- To wrap the text inside the shape, click **Invert**
- The shape may need to be adjusted so the text fits

- To add columns to the shape, go to **Object > Text Frame Options** and adjust the **Number of Columns**
